

## Sustainability Policy

At Saudi Arabian Packaging Industry WLL (SAPIN), we are committed to sustainable practices that minimize environmental impact, support social well-being, and ensure economic prosperity for current and future generations. As a leading metal and plastic packaging supplier to the Food, Paint, Industrial, and Aerosol industries, we recognize the importance of responsible stewardship of resources and strive to integrate sustainability into all aspects of our operations.

### Scope

This policy applies to all Saudi Arabian Packaging Industry (SAPIN)'s operations, including our manufacturing facilities, offices, and transportation fleet. We will also work with our suppliers and customers to promote sustainable practices throughout our supply chain.

### Goals

Our sustainability goals are ambitious and multifaceted. We aim to significantly reduce our greenhouse gas emissions, water consumption, and waste production by 2035. Additionally, we are committed to sourcing all our energy from renewable sources by the same year. Beyond these environmental targets, we are dedicated to supporting sustainable communities through our philanthropic programs and partnerships.

### Environmental Responsibility:

- 1. Resource Efficiency:** We aim to minimize waste and maximize resource efficiency in our manufacturing processes. This includes reducing energy consumption, optimizing water usage, and minimizing material waste through recycling and reuse initiatives. Future investment of capital expenditure (capex) will always prioritize resource efficiency to ensure sustainable growth and operational excellence.
- 2. Emissions Reduction:** We are committed to reducing our greenhouse gas emissions and continuously improving our carbon footprint through the adoption of cleaner technologies, energy-efficient practices, and sustainable transportation solutions. Starting in 2024, we will calculate CO2 emissions with the benchmark year being 2023, the first audit year of our calculation.
- 3. Waste Management:** We seek to minimize waste generation and promote recycling and proper disposal of waste materials. Focus will be on water and electricity reduction to further enhance our waste management practices.
- 4. Renewable Energy:** SAPIN has set the ambitious goal to transition towards 100% sustainable energy sources by 2035. We will achieve this by installing solar panels at our facilities in both KSA and UAE. During this transition, we will also annually purchase renewable energy certificates (RECs) to further reduce our carbon footprint and support renewable energy initiatives.

### Social Responsibility:

- 1. Health and Safety:** We prioritize the health and safety of our employees, customers, and communities. We provide a safe and healthy working environment, comply with relevant health and safety regulations, and promote a culture of safety awareness.
- 2. Community Engagement:** We are committed to engaging with the communities in which we operate, listening to their concerns, and contributing to their well-being through social initiatives, partnerships, and support for local development projects.

### Economic Sustainability:

- 1. Supply Chain Integrity:** We work with suppliers and partners who share our commitment to sustainability and ethical business practices. We promote transparency and accountability throughout the supply chain.
- 2. Innovation and Continuous Improvement:** We foster a culture of innovation and continuous improvement, seeking new technologies and practices that enhance sustainability and efficiency in our operations.

### Compliance, Audit and Reporting:

- 1. Regulatory Compliance:** We comply with all relevant environmental, health, and safety regulations, as well as industry standards and best practices in the countries we are operating in.
- 2. Carbon Footprint Audit:** In line with our commitment to sustainability, calculation of our carbon footprint emission will be performed yearly starting from 2023. This annual audit, conducted by a recognized global company, will serve as a foundational step towards our ongoing efforts to reduce our greenhouse gas emissions and improve our environmental performance.
- 3. Reporting:** We are committed to transparent reporting on our sustainability performance, including our progress towards goals, challenges faced, and lessons learned. We engage with stakeholders to ensure transparency and accountability. We will periodically report all data on our website and internal documents.

### Conclusion:

At SAPIN, sustainability is a core value that guides our decisions and actions. We will continue to evolve our sustainability practices, seeking new opportunities to improve our environmental, social, and economic performance, and contribute to a more sustainable future for all. With a commitment to innovation and continuous improvement, we aspire to be the leanest and cleanest packaging supplier in the region.
